Conditions of Sale(Back Cover)

These fittings are for use with IPS diameter PVC pipe made to ASTM D2241, ASTM D1785, ASTM D2665 and any other PVC pipe made to IPS diameters.

WARNING: Frequent or severe cyclical pressure surges (WATER HAMMER) can destroy PVC fittings. Where such conditions may exist, HARCO DEEP BELL DUCTILE IRON FITTINGS for IPS size PVC pipe should be considered. HARCO DEEP BELL DUCTILE IRON FITTINGS for IPS diameters are available in sizes 1½" through 12".

MA Style: These fittings use Sch 40 PVC fittings. Sch 40 PVC fittings do not have a long term pressure rating. See ASTM D2466. Use of these fittings in pressure systems is at user's risk.

NOTE: The use of anything but properly designed and installed thrust blocks or mechanical joint restraint products will reduce the life of plastic fittings. Thrust blocks must be of poured concrete only and sized for the soil conditions.

CAUTION:

- At a minimum, when these products are used in a gravity sewer system, installation per ASTM D2321 and the PVC Pipe Association (Uni-Bell) should be followed.
- Sewer service laterals are to be installed at an angle of no more than 45° from the horizontal unless provisions are made to prevent loads and displacements from differential settlement to be applied to the pipe and fittings. Failure of a fitting in a service lateral whose rise at any point is greater than 45° indicates inadequate provisions and/or inadequate construction of the provisions.
- All joints including, mating pipe and fittings must be straight and aligned with no angular joint deflection. Bending of the pipe for any reason is prohibited.

WARNING: Frequent or severe cyclical pressure surges (WATER HAMMER) can destroy PVC fittings. Where such conditions may exist, HARCO DEEP BELL DUCTILE IRON FITTINGS for IPS size PVC pipe should be considered. HARCO DEEP BELL DUCTILE IRON FITTINGS for IPS diameters are available in sizes 1½" through 12".

MA Style: These fittings use Sch 40 PVC fittings. Sch 40 PVC fittings do not have a long term pressure rating. See ASTM D2466. Use of these fittings in pressure systems is at user's risk.

NOTE: The use of anything but properly designed and installed thrust blocks or mechanical joint restraint products will reduce the life of plastic fittings. Thrust blocks must be of poured concrete only and sized for the soil conditions.
