CAUTION:

- At a minimum, when these products are used in a gravity sewer system, installation per ASTM D2321 and the PVC Pipe Association (Uni-Bell) should be followed.
- Sewer service laterals are to be installed at an angle of no more than 45° from the horizontal unless provisions are made to prevent loads and displacements from differential settlement to be applied to the pipe and fittings. Failure of a fitting in a service lateral whose rise at any point is greater than 45° indicates inadequate provisions and/or inadequate construction of the provisions.
- All joints including, mating pipe and fittings must be straight and aligned with no angular joint deflection. Bending of the pipe for any reason is prohibited.
