

METALLIC NIPPLES

Engineered for Durability

PRODUCT DESCRIPTION

1½", 2", 2½" and 3" iron pipe size (IPS) size ductile iron nipples, TBE (Threaded Both Ends), lengths from 2" to 12" in 2" increments. Nipples can be furnished Threaded, Plain End, and Groove End.

APPLICATION

HARCO ductile iron nipples are designed to be used wherever brass, galvanized, black iron or PVC nipples are used in irrigation, industrial, and waterworks applications. Nipples used in conjunction with iron couplings allow HARCO Lateral 90's to be raised 2" to 12" in 2" increments.

FEATURES AND BENEFITS

- ASTM A-536 ductile iron material with tensile strength of 65,000 psi is much stronger than brass or PVC. Eliminates breakage of PVC nipples caused by high torque, external loads and ground movement.
- Different coatings are available. Bituminous and Fusion Bonded coatings are NSF61.
- Ductile Iron thread fittings also available.

- Available in IPS size diameters 1½" (1.900"), 2" (2.375"), 2½" (2.875"), and 3" (3.500").

SUGGESTED SPECIFICATION

1½" through 3" nipples shall be made of ductile iron meeting ASTM A-536, Grade 65-45-12, pressure rated 250 psi, and diameters equivalent to IPS size. Threads shall be FNPT per ANSI B.120-1. Nipples shall be manufactured by the Harrington Corporation of Lynchburg, Virginia.

How to Order Nipples:

Product # = 870 + Size + Length

1½" = 15
2" = 20
2½" = 25
3" = 30

2" = 02
4" = 04
6" = 06
8" = 08
10" = 10
12" = 12

Example: 2" x 6" = 87020-06

Example: 2" x 6" = 87020-06S ("S" at end of the part number denotes Stainless)
